INFO

- ☼ The pH value of the spray solution should be adjusted to 5.5 with citric acid.
- ☼ The addition of **AKRA** foliar fertiliser can and may reduce the pH value of the spray solution.
- ☼ Mix in any other products individually once the pH value has been adjusted!
- ☼ Make sure that you add the additional products in the right order.
- ☼ The dosage of **AKRA** foliar fertiliser must be adjusted to the quantity of water used.
