Foliar fertilising

Application time

⚙ Before head formation–**Watch out for aphids!**

Application rate | per ha

Water	200 l
AKRA Plus 9	0.5 l
AKRA Blatt	1 l
AKRA MSB	2 l
AKRA Azotobacter	0.5 l

INFO

- ⚙ The spraying should be carried out in the morning.
- ⚙ Ventilate the glass or poly greenhouse.
- ⚙ The pH value of the spray solution should be adjusted to 5.5 with citric acid.
- ⚙ The addition of **AKRA** foliar fertiliser can and may reduce the pH value of the spray solution.
- ⚙ Mix in any other products individually once the pH value has been adjusted.
- ⚙ Make sure that you add the additional products in the right order.
- ⚙ Do not spray in direct sunlight.
- ⚙ The dosage of **AKRA** foliar fertiliser must be adjusted to the quantity of water used.

SUCCESS

WITH THE **AKRA FERTILISING SYSTEM**
