

Application Advice

Mouse Infestations

Soil fertilising

As of May 2024

Application rate | per ha

1st Application

Water	200 l (use 300 l of water for direct seeding)
AKRA Plus 9	0.25 % (0.5 l)
AKRA Sulpur+	1.5 % (3 l)
AKRA WD	0.5 % (1 l)

Application time

- ⚙ Can also be used on existing crops.
- ⚙ A second application can be carried out 10 days later if necessary.
- ⚙ Do not apply if the air temperature is below +10°C.

INFO

- ⚙ The pH value of the water should be adjusted to 5.5 with citric acid.
- ⚙ The addition of **AKRA** foliar fertiliser can reduce the pH value of water further.
- ⚙ Mix in any other products individually once the pH value has been adjusted.
- ⚙ Make sure that you add the additional products in the right order.
- ⚙ The dosage of **AKRA** foliar fertiliser must be adjusted to the quantity of water used.
- ⚙ Maximum speed during crossing: 8 km/h
